UK DENTAL SOLUTIONS

# TEETH & TISSUE MASTER CREATION COURSE WITH STEFAN PICHA

MASTER DENTAL TECHNICIAN

Throughout this spectacular two-day hands-on course, you'll be layering a 6-unit anterior Zirconia bridge framework within our studio, with the usual Ceramet hospitality treatment. Here you'll be given the opportunity to acquire expertise in the layering of individual teeth and gingiva with Stefan.

Learn everything about managing tooth and tissue opacity with translucency, how to apply the use of stains for individual effects and achieving the optimum surface texture.

*"Layering white and pink isn't everything, perfect harmony between both is important to understand, and how the margin form flows with the tooth shape, and why this is so."*

*"The aim over the entire two days is to combine these techniques and skills, helping you create a natural appearance within your restorations, and enabling you to get a little closer to nature".*

STEFAN PICHA

**STEFAN PICHA**  
MY DENTAL WAY OF LIFE...

**After training within the laboratory since 1992, I found my pathway within dental technology.**

From 1996 with the help of Michael Heinz Polz and Stefan Schunke, I gained a valuable skillset in the fields of aesthetics, form and function, where I continued on my dentistry journey.

In 2002 I completed my master examination at the Masters School in Nuremberg, which is a major landmark within my career.

Since 2009 I became a member of the Master Examination Committee in Nuremberg, and in 2010 I became self-employed launching my own laboratory in Fürth Germany.

Within 2015 I became a proud member of the oral design foundation, and now enjoy helping technicians find and follow their pathway through the industry.

## HOW TO FIND US

You can find our office and TechStudio in King Edward House, 1 Jordangate – the entrance to the car park and office is on King Edward Street, simply turn onto King Edward Street and the car park is on the right.
